Your Comments:

I'm very disappointed in the draft cleanup plan for the Willamette River.

"Monitored Natural Recovery" is insufficient and flies in the face of scientific evidence. This feels like a politicized decision that reflects the interests of big businesses, rather than the public's wants and needs.

We need to remove polluted sediment and we should be aiming to remove the Fish Consumption Advisory for the Lower Willamette within 10-20 years. And I do not want a toxic waste disposal dump in the river is not acceptable. The entities that caused the pollution need to pay for a comprehensive cleanup.

Thank you for your time,

(b) (6)
